

GARANT

ENTRANCE DOOR

GARANT FOR YOUR HOME

The door does not only serve as an entrance to the building. They should meet higher standards in terms of thermal insulation, safety, functionality and design as well as other building components.

Discover the top range of Garant doors, designed for maximum safety, durability and energy efficiency.

WHY CHOOSE **GARANT** SYSTEMS?

The door system has a 5-chamber profile construction and combines high stability with excellent thermal insulation properties.

Thanks to the special design principle and the high proportion of aluminum, the system guarantees functional reliability for every area of application, whether it is an elegant entrance door or a business door.

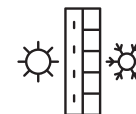

SAFETY

GARANT door systems offer a flexible design up to resistance class RC3 for various security requirements against burglary in buildings.

TECHNOLOGY

We combine the latest profile technology and mechanics with automated components that offer added comfort, safety and automatic accessibility.

ENERGY EFFICIENCY

Weather and thermally insulated door systems are essential for an energy efficient home.

WITHOUT BARRIERS

Thanks to their universal application, GARANT door systems offer barrier-free solutions for many cases.

GARANT AD UP 90

STABILITY AND DESIGN

EXCELLENT HEAT INSULATION

For an energy-conscious life.

Thanks to the best thermal insulation properties, the door ensures a pleasant climate in the room at all times.

ZERO LEVEL

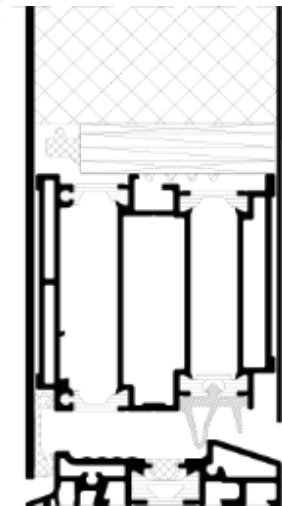

Ease of access

Barrier-free zero-point threshold for travel-free entry into a building with the highest requirements for weather resistance and durability.

DESIGN

...is important!

Very attractive door design thanks to completely hidden hinges that are not visible from the inside or outside.

- Installation depth 90mm
- Uf values up to 1.3 W/(m²K)
- Sheet height up to 2500 mm
- Thermal insulation with Uf value up to ≥ 1.3 W/(m²K)
- With the system, it is possible to combine glass thickness from 28 to 68mm
- Break-in resistance up to RC 2 (WK2)
- Performance and design protect you from everyday uncontrolled noise up to 42db.
- High-quality appearance with fillings that close the leaves
- Available with padding that closes the sheet on one or both sides

GARANT AD UP 75

UNIVERSAL APPROACH

OPTIMUM PERFORMANCE

With maximum stability The Garant AD UP door system covers all basic depths and shows how stability and thermal insulation can be achieved through intelligent construction principles.

EXCELLENT RELIABILITY

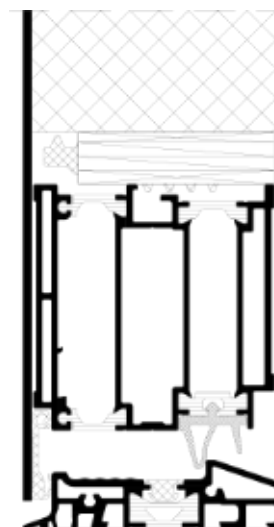

and complete flexibility

Whether it is an elegant entrance door or a commercial door that is used frequently, the system platform offers individual solutions to meet different requirements

OPTIMAL CONVENIENCE

with an exceptional design

The Garant door system combines state-of-the-art profile technology and mechanics with automated networkable components, providing additional building comfort and security.

- Installation depth 75mm
- Uf values up to 1.4 W/(m²K)
- Sheet height up to 2500 mm
- Thermal insulation with Uf value up to ≥ 1.3 W/(m²K)
- With the system, it is possible to combine glass thickness from 13 to 53mm
- Break-in resistance up to RC 3 (WK2)
- Performance and design protect you from everyday uncontrolled noise up to 42db.
- High-quality appearance with fillings that close the leaves
- Available with padding that closes the sheet on one or both sides

GARANT ADS UP 65

MULTIFUNCTIONAL,
COST-EFFECTIVE
DOOR SYSTEM

ESPECIALLY ROBUST AND DURABLE

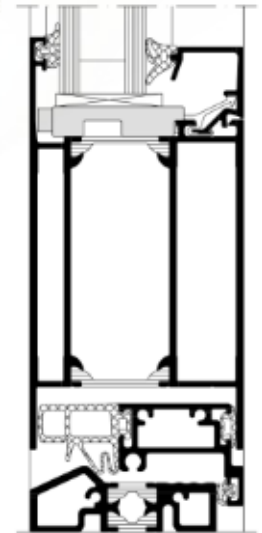

Garant ADS UP 65 doors are made of high-quality materials that ensure maximum strength and long-lasting performance. They are particularly suitable for use in commercial and industrial environments, where they are exposed to intensive use and frequent wear and tear.

IDEAL FOR BUSY PEOPLE THEY GO IN AND OUT

Garant doors are the perfect choice for busy entrances and exits that require durability and reliability. The doors are designed to withstand heavy use and high traffic, making them ideal for commercial and industrial environments.

SECURITY CLASS UP TO RC3

The Garant door system combines state-of-the-art profile technology and mechanics with automated components that can be networked, providing additional building security.

- Installation depth 65mm
- Uf values up to 1.4 W/(m²K)
- Sheet height up to 2500 mm
- Thermal insulation with Uf value up to $\geq 2.2W/(m^2K)$
- With the system, it is possible to combine a glass thickness of 45mm
- Break-in resistance up to RC 3 (WK2)
- Performance and design protect you from everyday uncontrolled noise up to 42db.
- High-quality appearance with fillings that close the leaves
- Available with padding that closes the sheet on one or both sides

HINGES

with the Garant you can choose three hinge options for your new front door. It is possible to choose from simple standard systems to elegant fully hidden hinge systems that make your front door even more modern.

Tubular

- One hinge for every application
- Can be retrofitted if needed
- High level of stability thanks to reinforced hinge loops
- Max. load capacity 200 kg
- Available in various color/design options

Hidden

- One hinge for every application
- Can be retrofitted if needed
- High level of stability thanks to reinforced hinge loops
- Max. load capacity 200 kg
- Available in various color/design options

External

- Attractive, robust hinge
- 2-piece or 3-piece design available
- A continuous, solid stainless steel hinge pin ensures a high level of hinge stability
- It can withstand loads up to 200 kg sheet weight

Opening with a touch!

With our doors, you can choose modern and safe solutions for locking and opening doors.

BIOREADER

The fingerprint scanner gives you the possibility of faster and easier access and unlocking the door with a simple fingerprint. It is possible to store up to three prints for up to 166 different people.

TOUCHPAD

A small code keypad primarily intended for installation in a door leaf. A logical choice for anyone looking for an alternative to a fingerprint scanner. With a capacity of 100 unique code entries and one administrator code, no one will be left without their "key".

BIOHANDLE

Stainless steel handle with integrated fingerprint reader. Available in many shapes and sizes. The control unit is mounted inside the door frame and is available for aluminum/PVC doors. The fingerprint reader can be integrated on the front or back of the handle.

MOBILE APPLICATION

New technologies allow greater flexibility and greater control using your own mobile device. The user can choose when and how to use the system, whether it's full control via a mobile app or a combination of technologies.

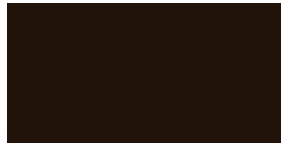

World of color

All GARANT decors have innovative color technology. This technology guarantees significantly improved performance and even longer surface life. These are the most commonly used colors, and it is possible to choose other colors according to the RAL map.
